12:55-14:15	1. Leadership in a multidisciplinary team Bhugra Dinesh 2. How can I ensure my continuous growing as professional? Maurits Nijs & Jolien Bueno de Mesquita 3. Empowering the younger generation in their professional growth: a Belgian perspective Caroline Depuydt

Leadership in psychiatric practices, and more generally within organizations is a hot and important topic. However, it is barely addressed in psychiatric training courses. Many recognized psychiatrists are also looking for guidance in this area at the beginning of their careers. That is why the Professional Association organizes a high quality and innovative seminar on this theme: 'Leadership in Psychiatry'.

The working method is dynamic with a combination of presentations and active workshops in which your own questions are the main focus. The working language is English, with the possibility to communicate in Dutch and French during the interactive workshops.
