

Scientific Session

Laboratory Quality Control : does it matter for the clinician?

June 18,
Clinique Saint-Luc,
Bouge

It is with great pleasure that we invite you to this Scientific Session that will give you the opportunity to get the latest information on specific topics and to discuss clinical cases with speakers and your colleagues. The next session will be about "Laboratory Quality Control : does it matter for the clinician?" Behind every sample is a patient waiting for the right treatment. Find out how an increased focus on quality control in the lab has a direct impact on the quality of care in the clinic.
