MEDIPOINT

Introduction

Dear Colleagues,

The advanced course aims to teach musculo-skeletal ultrasound and is designed to improve the practice of ultrasound examinations.

For that purpose, the key anatomic structures are discussed for each joint and emphasis is placed on training each participant individually in practical sessions. This is guaranteed by the presence of experienced teachers and by the limited number of participants (maximum 24) accepted for each training session.

Previously attended basic course is required to be able to follow the advanced course!

We look forward to seeing you in Brussels,

Stefaan Marcelis,
Tjeerd Jager,
Kurt Vanderdood &
Michel de Maeseneer

Programme spring 2016

Friday, February 26 & May 20

- 13.45 – 14.00 Welcome and introduction
14.00 – 16.00 **Shoulder**
- RC Interval:
 - Anatomy
 - Capsulitis
 - Tendinopathy long biceps tendon
 - Rotator Cuff:
 - The different layers and corresponding lesions
 - Isolated subscapularis and infraspinatus injury
 - Teres Minor evaluation
 - Correlation between symptoms and RC injury before and after surgery
 - Impingements and dynamic shoulder evaluation
 - Structures and lesions around the shoulder
- 16.00 – 16.15 *Tea / Coffee Break*
16.15 – 18.15 **Elbow and forearm**
- Distal biceps tendon
 - Anatomy:
 - BAM lacertus fibrosis, insertion
 - Pathology:
 - (partial) tear, tendinopathy, bursitis
 - Triceps anatomy, enthesopathy, (partial) tear
 - Nerves elbow region:
 - Median nerve and divisions
 - Radial nerve and evaluation of Frohse
 - Extensor tendons anatomy

Saturday, February 27 & May 21

- 08.15 – 09.45 **Thoracoabdominal wall**
- Muscle anatomy
 - Muscle injury
 - Bone lesions
 - Tumors
 - Hernia
- 09.45 – 10.00 *Tea / Coffee Break*
10.00 – 13.00 **Wrist and hand**
- Extrinsic and intrinsic ligaments of the wrist
 - TFCC: dynamic
 - UCL thumb dynamic
 - Ext fingers dynamic (Boutoniere)
 - Palmar plate and ligaments dyn.
 - Beak ligament
 - Ligament of IPP joints
 - US evaluation of the operated CT
 - Radial nerve and digital nerves
 - Dupuytren's disease
- 13.00 – 14.00 *Lunch*

- 14.00 – 16.00 **HIP**
- Psoas tendon
 - Anatomy and pathology
 - Conflict after Total Hip Replacement
 - Echo anatomy of the hamstrings
 - Morel-Lavallee lesion
 - Nerves of the hip region
 - Labrum and impingement
 - Snapping hip
- 16.00 – 16.15 *Tea / Coffee Break*
16.15 – 18.15 **Knee and lower leg**
- Anatomy of: quadriceps tendon, plantaris, popliteus, soleus muscle
 - Medial patellofemoral ligament
 - TKP and ACL plasty
 - Frictions and impingements
 - Posterolateral corner
 - Nerves lower limb

Sunday, February 28 & May 22

- 08.30 – 10.30 **Dynamic evaluation of the ankle**
- When?
 - ATAF
 - Calcaneofibular ligament
 - Inferior tib-fib syndesmosis
 - Deltoid ligament
 - Peroneal tendons
 - Post tibial tendon
 - Ant and post recess
 - Impingements
- 10.30 – 10.45 *Tea / Coffee Break*
10.45 – 12.45 **Foot**
- Bone lesions
 - Nerves and tarsal tunnels
 - Chopart ligaments
 - Spring ligament
 - Sinus tarsi
 - Insertion Tibialis posterior and anterior tendons
 - Per. longus tendon, knot of Henri
- 12.45 – 13.00 Course evaluation and closing remarks
